

TO ALL MY FELLOW RESIDENTS

I am Dennis Franek, town board member since 2001 and chairman past 20 years.

My whole life motto was always "If it works, why fix it" But that is not always the case.

These past years it has been my ambition for a new "town hall" ; something modern to serve the TOWN Better! Currently we are in the "pricing, estimating, and financing stages of the proposal.

A new town hall with heat and AC, good storage space, running water, indoor restroom, small Kitchenette; all the ammedities of a good municipal building. A building to better serve the people.

A structure for possible future small gatherings. I believe it is time to move on and upgrade

The lot viewed is right across road from current hall, and is flat and open area (field) at a fair price

And approximately 1 ½ acres. Personally I feel it is perfect for site.

As we get numbers for cost and options for financing, we will keep you informed on website/ facebook.

Be assured, nothing will be initiated without public approval. We would appreciate any feedback from you to any board member during this period of time. "Share your thoughts please"

THIS PROJECT WILL NOT ONLY SERVE THE TOWN BOARD BUT!! YOU ALSO!!

Thank you for reading this info

Yours truly

Chmn- Dennis Franek
